Better, Faster, Stronger, Prettier Direct Composites with the Injection Molding Technique.

Presented by David Clark, DDS

DATE: Friday, October 26, 2018
TIME: 8:30 AM – 4:30 PM
Credits: 7

Emerald Queen Conference Center
5580 Pacific Highway E.,
Fife, WA 98424

Ceramic restorations have long been considered the optimal choice for predictable aesthetics and longevity. “Bonding” has been considered a short-term solution that can be both technically challenging and aesthetically unpredictable. The injection molding technique with ultra-thin Bioclear anatomic tooth forms has created a “Third Modality” with monolithic restorations that can endure and sparkle for decades.

Course Objectives - As a result of attending this course, you will learn:

1. Deep Class II and Class III restorations leveraging selective caries removal, radius bevel design, injection molding basics and the 3-step Rock Star Polish.
2. Deep Class II and Class III restorations leveraging selective caries removal, radius bevel design, injection molding basics and the 3-step Rock Star Polish.
3. An update of Black Triangle treatments will be demonstrated and performed. The all new Black Triangle Treatment System will be introduced that has simplified treatment of maxillary black triangles with monolithic injection over molding to rejuvenate the aging and post-ortho tooth.
4. Midline Diastema closure using special Diastema Closure matrices and updated technique to assure tight and broad contact, symmetrical teeth, and aggressive emergence profile to stimulate immediate papilla generation.
5. Quadrant treatment of Class II composites.

Type	On or Before October 19, 2018	After October 19, 2018
Dentists	\$245	\$270
Retired Dentists / Staff	\$150	\$175

About our Presenter: Dr. Clark is co-director of Bioclear Learning Centers International and the Academy of Microscope Enhanced Dentistry. He and Dr. John Khademi are acknowledged as fathers of Minimally Invasive Endodontics, which at first was rejected by most North American endodontists, but is now being embraced by the mainstream. Dr. Clark published the first guide and classification system for dentin and enamel cracks based on 16 power magnification and has conducted studies on cracked teeth. He has designed numerous instruments, burs, wedges, matrices, separators and equipment and has written chapters for both esthetic dentistry and endodontic textbooks. He has been granted several US patents. Dr. Clark served for 18 months as the lecturer and lead dentist for CRA during Gordon Christensen’s absence and served on CRA’s board of directors for several years. He maintains a private practice in Tacoma. Disclosure: Dr. Clark has disclosed that in the past year he has received financial support from the following companies: 3M, Clinician’s Choice Dental Products, Inc. and SS White Burs, Inc. The staff of the University of Washington Office of Continuing Dental Education, Seattle-King County Dental Society and Foundation, and the Pierce County Dental Society and Foundation have no relevant financial relationships to disclose.

The Seattle-King County Dental Society is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The format continuing education programs of this program provider as accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approval extends from 4/1/2017 until 3/31/2021. Provider ID # 212499.
