The central theme of our annual crew seminar was to take our company to a "best in class" performance standard. Carol's Respectful Workplace training was enlightening, empowering and energizing. It gave our crew members communication and team building tools that don't just look good on paper, they work in practice. Carol's presentation created a foundation for our employees to reach for and attain "best in class", as individuals and as a team.

-Jeff Slesinger, Western Towboats

I took a lot away from your presentation. Identifying my own communication style(s) as well as awareness of another's (different but still valid) type has helped me a lot. I use the "3 minute rule" to truly listen to the other person, recognize that my style may differ, and change the way I listen. It's been very helpful.

-Grady Williamson, Washington State Department of Enterprise Services

Carol's Respectful Workplace Training has been highly effective for our organization. We are very pleased with the training and staff have said that they have enjoyed this workshop. Carol uses a combination of interaction, real life experiences and a great sense of humor to keep her audiences engaged. She was flexible and thoughtful in collaborating with us to develop a curriculum that met the needs of our organization. We will continue to utilize her for future training opportunities.

-Christina Roberts, Port of Tacoma
