AFTER THE PATCHES ARE REMOVED – VISIT #2

Patch testing can be an overwhelming, stressful and a confusing time. The information at www.mypatchlink.com can be extremely helpful. We recommend our patch test patients explore this web site to learn about Allergic Contact Dermatitis.

Please view the video: Patch Testing (for Patients) featuring Sharon Jacobs MD

Welcome to MyPatchLink.com

MyPatchLink.com is your online resource to everything related to contact dermatitis. On this site you will find instructional videos, informative materials, printouts and articles to help you best manage your allergy.

The patch test process is not over; **showering is still prohibited**. The use of topicals, medications or oils on the back is not allowed at this time.

If you have an itchy, red, bumpy or angry spot on the back, this is a good sign; we want to see this reaction without treatment at your next visit.

Please bring in your products again to your next appointment. If the item does not have the ingredients on the label, please print them from the internet.
