

My treatment would have been impossible without my parents. They invested time and money by paying for my braces and driving me to my appointments which I am truly grateful for. I can pay this gift forward by simply smiling. A smile can enhance a stranger's day and instill them with a positive feeling. The contagiousness of a smile spreads happiness and creates an enthusiastic and welcoming atmosphere which has an impact on everyone. My parents transformed my smile but they also transformed the way I perceived myself as well as the perception of those around me.

Dr. Dumore & Team and my parents have gifted a new smile to me which will be of benefit through my lifetime. It will continue to be an important part of my confidence and self-esteem which is a factor in how others perceive me. My treatment improved my oral health which has truly made a significant change in my diet and self-consciousness. My new smile allows me to spread positivity and happiness which is not only rewarding to myself but to others as well.
