

## Dental 3D University Updates Speaker Lineup

KaVo Kerr Group Imaging's world-class educational event appoints new event moderator and welcomes dynamic new speaker.

**19 August 2016** – An event designed for dedicated clinicians interested in a comprehensive approach to 3D imaging integration in their practices, the second annual Dental 3D University (3DU), features a lineup of world-class educators. Recent updates and additions to this roster include:

Highly respected in the dental corporate and education community, President and CEO of Cellerant Consulting Group **Dr. Lou Shuman**, will be taking on the moderator role, bringing his unparalleled ability to make innovation accessible and help dentists across the technology adoption spectrum get the answers they need to make smart choices. Cited by Dr. Gordon Christensen as “one of the most influential dentists in the country today,” Dr. Shuman will also offer his unique expertise in Internet strategy, emerging technologies, e-learning and digital marketing as they relate to the dental community, speaking from his perspective as a Venturer in Residence at Harvard's Innovation Lab.

A new name on the esteemed list of presenters is **Dr. Kevin AminZadeh**, an international speaker and a key opinion leader in the field of digital dentistry, implantology, and microscope enhanced dentistry. He has built his practice upon digital treatment planning of complex oral rehabilitations. He is a consultant for oral and maxillofacial surgeons, periodontists, and general dentists. In 2015 Dr. AminZadeh founded Implant Genius, an implant treatment planning company based in Vancouver. He is an expert in digital workflow stages from digital record taking, implant treatment planning using implant planning software, implant placement using surgical guides, and custom prosthodontic restorations.

Held October 7-8, 2016, in Boston, MA, 3DU is hosted by KaVo Kerr Group imaging brands Gendex™, NOMAD™, SOREDEX™ and Instrumentarium™. The 2-day event offers dental professionals an educational environment dedicated to Cone Beam 3D (CBCT) solutions – worth up to 11 CE credits – that will enhance their practice and put them in full control of treatment outcomes. In addition to Drs. Shuman and AminZadeh, other speakers include:

- Lou Graham, DDS, on his Journey to 3D
- Gy Yatros, DMD, on 3D Airway Analysis
- Kaveh Ghaboussi, DMD, on using 3D for Implant Planning and more
- Douglas Chenin, DDS, on Success with surgical guides
- Terry Work, DMD, on Simple, Predictable Implant Planning
- Lisa Koenig, BCHD, DDS, MS offering Anatomy and Pathology Review
- Christine Taxin on Medical Billing and Insurance Reimbursement

11727 Fruehauf Drive | Charlotte, NC 28273
