

# SAVE THE DATE

## Full Arch Rehabilitation and My Practice- What to Know

*Dr. Arne Hoffmann's early experiences as a CDT in Germany, residency in periodontics, practice as a perio-prosthodontist, his involvement as Clinical Director for NDX/Perry & Young, as well as his focus on implantology and complex treatments; make him the perfect expert for this series and proves invaluable to our office and patients when facilitating these types of cases for our referring doctors.*

Presented by ARNE HOFFMANN, PhD (Germany), DDS(Germany), CDT (US), CDA (US)

Co-sponsored by Dr. Cory Ryan, DDS, MD and Nobel Biocare

| Course Dates        | Time                  | Location              | Tuition       | CE            |

### Course summary

We will begin our Spring CE series with a presentation by Matt Pittman, Regional Manager from Nobel Biocare. Matt will provide us with an introduction to Nobel's "Treatment Efficiency Model". This will explore the barriers to treating edentulous patients, expanding your practice with "All-on-4" procedures, and the business model surrounding these procedures.

Sherri Fox will then provide her insights on what takes place once your patients arrive at Mountain OMS. She will provide a better understanding of how to assure your patients of a great outcome and help them understand the variety of treatment options available from Dr Ryan.

Session two will see the return of Dr Arne Hoffmann. He will focus on the concepts and available treatment options, as well as how to identify a suitable patient for these procedures.

Our third session will feature a hands-on evening, covering the application of a verification jig, which is the most critical step for the success of the all-on-4 treatment. Dr Hoffmann will cover the variety of steps involved in a typical all-on-4 procedure and what to expect along the way.

### Attendees will receive:

- Nobel Biocare literature and materials
- Dinner will be provided
- 2 CE credits

### Registration:

Please register for this course by contacting Sherri at Mountain Oral Surgery and Dental Implant Center.
