About our Speaker:

Dr. Stewart is an Associate Professor in the Department of Pathology & Radiology at the Oregon Health & Science University School of Dentistry. He also serves on the faculty of the Department of Pathology at the School of Medicine at OHSU. He attended college at the University of Delaware and received his dental degree from the University of North Carolina. Following a general practice residency in Wilmington, Delaware, he attended the University of Michigan where he received a master’s degree in oral pathology and diagnosis. He is a Fellow of the American Academy of Oral and Maxillofacial Pathology, Diplomate of the American Board of Oral and Maxillofacial Pathology and a Fellow of the International College of Dentists, American College of Dentists and Pierre Fauchard Academy. Dr. Stewart has served on the dental school faculties of the University of Michigan and the University of Pennsylvania prior to his appointment at OHSU where he teaches dental students, graduate dental students and residents and is a participant in the Oral Pathology Biopsy Service and Faculty Dental Practice. He has published over ninety articles, abstracts, and book chapters. He is currently on the Executive Council of the American Academy of Oral and Maxillofacial Pathology. As a member of organized dentistry, he has been a delegate to the Oregon Dental Association House, a member of the Multnomah Dental Society Board of Directors, President of the society and a member of the ODA Board of Trustees. He is now currently the Speaker of the House of Delegates of the Oregon Dental Association. He will complete his term as the national President of the Supreme Chapter, Omicron Kappa Upsilon Dental Honor Society in 2013.

The most common periapical and periradicular lesions of the maxilla and mandible are inflammatory lesions of bone representing reactions to infection and necrosis of the dental pulp. These lesions include the periapical granuloma, radicular (periapical) cyst, and chronic periapical abscess. However, there are many other primary and secondary disease processes which may develop within the jaws in juxtaposition to the teeth. The subject of this lecture is a review of the various disease processes that may arise within the jaws including cysts, odontogenic tumors, benign non-odontogenic tumors, fibrousosseous lesions, inflammatory lesions and malignant neoplasms. The emphasis will be on the etiology, demographics, pathogenesis, clinical features, radiographic features, treatment and prognosis of these lesions.

Please make reservations by January 10, 2013
OFFICER AND COMMITTEE CORNER . . .

PRESIDENT’S MESSAGE...
From Jared Thompson

Happy Holidays to everyone! I always enjoy this time of year because it allows me to reflect on the successes and failures from the last 12 months. This gives me incentive to set new goals for the upcoming year in hopes of improving productivity, efficiency and, most importantly, morale in the office. Maintaining an optimistic view of the economy may be difficult this upcoming year as we prepare for the implementation of the Affordable Care Act and the 2.3% Medical Excise Tax. Although there is uncertainty surrounding these topics and how it may affect our practices, I was pleased to see that the ADA was heavily involved in trying to protect its members from these increased taxes. Regardless of the outcome, our challenge this year will be to create a positive atmosphere in the workplace for our staff to feed off of, which will hopefully translate to increased productivity, thus offsetting the estimated increase in overhead.

There are a few certainties in life. Just like taxes, we can always count on Give Kids A Smile in February. This year the event is on Saturday, the 2nd and will be held in Hillsboro at Pacific University. Please contact WCDS to obtain the information you need to volunteer your services. What a great opportunity to give back to our community!

Following the topic of morale, nothing builds morale like a mandatory Risk Management meeting. Thanks to all who attended. As usual, the content was both informative and stimulating in the sense that many of us probably learned how we could improve in some areas, and were stimulated to begin making the necessary changes in our practices.

Our next meeting is January 15th, and the topic will focus on the differential diagnosis of jaw lesions, as presented by Dr. Jeff Stewart. Please mark your calendars accordingly. We look forward to seeing everyone there! Good luck to all in the upcoming new year!!

Jared Thompson, DMD

A Note from Executive Director…

It’s that time of year to be thinking about nominations for the 2013-2014 Executive Board and Committee Members, as well as Delegates to represent WCDS at the September 2013 House of Delegates. If you would like to volunteer or know of someone you would like to nominate, or if you simply have questions, please call one of your current WCDS Board members or me. Our phone numbers are listed on this page. Or send me an email at wcaskathy@comcast.net before January 8th, and I will pass along your nominations, questions and comments to the Executive Board at our next meeting.

We hope that you will consider becoming involved with Washington County Dental Society, or plan to continue with the commitments you are currently fulfilling. Consistent leadership and fresh perspectives are always welcome. Best wishes to all for a happy and prosperous 2013!

Kathy Reddicks, DMD

Report from the 2012 House of Delegates

The House of Delegates met on September 7 and 8 at Eagle Crest Resort. Most of the business was routine this year, with speeches and reports and updates of local and national issues affecting dentistry. Jill Price is our President, Judd Larson is President-Elect, Steven Timm is Vice-President, and our own Rick Asai is an ADA Delegate at Large. We also elected 3 members to the Leadership Development Committee. All the races were uncontested. We approved a $17 cost of living dues increase. There were several resolutions revising the terminology of bylaws and such. Bill Zepp is retiring and it was recently announced that Donald W. Brethauer, CAE, has been named new Executive Director of the ODA, beginning January 21, 2013.

The primary issue of this House was changing the structure of the Board of Trustees. Last year we voted to not change the House of Delegates, and this year we voted in favor of changing the Board of Trustees. We felt that the House of Delegates is a good way to get more people involved with a minimum time commitment, but the Board of Trustees needs to be a smaller group of committed individuals.

The Trustees in the past have been chosen based on their component society (i.e. county or region) and on the number of member dentists in that component. After a fair amount of discussion the Board of Trustees will now be 14 voting members and 4 nonvoting members. 12 trustees are elected. The student member and the Secretary-Treasurer are the other two voting members. Each elected trustee serves for 4 years for a maximum of 2 consecutive terms. The President and President-Elect are part of the 12. This means someone needs to run for President Elect before their 6th year. This structure eliminates the Executive Committee. Of the 12 At Large trustees there may be no more than 3 from any given component. The original resolution divided trustees from the tri-county region versus outside the tri-county region, but it was changed to reflect that we are trying to get the best people for the job and the component limitation was enough to ensure regional diversity.

The hope is that this structure eliminates the feeling that a trustee could skip meetings since the other trustee would be there, and to ease the burden of the number of trustees needed from outside the tri-county area. I believe this resolution was well thought out, but only time will tell how well it meets the goals.

If you haven’t seen the video “Teach Me How to Brushy” yet, then check it out on YouTube. Please support the new dental school with your time and money and support your local society by coming to meetings and volunteering. Next year the House of Delegates will meet in Sunriver on September 6-7. I hope to see you there.

Respectfully Submitted,
Cynthia A Layport, DMD (Cindy)
Give Kids A Smile

SATURDAY, February 2, 2013

February is fast approaching and that means so is National Children’s Dental Health Month. Pacific University, with the support of Washington County Dental Society, is hosting a Give Kids A Smile event on Saturday February 2, 2013.
