Management of The Fearful Dental Patient - AM Session:
Fear of the dentist is one of our most common fears. Many patients have avoided seeking dental treatment because of these fears.

In this program, Doctor Malamed will review the more commonly employed management techniques for dental fear and anxiety, including the oral route of drug administration (e.g. triazolam [Halcion]); inhalation (N20-02); intravenous (IV), intramuscular (IM) and intranasal (IN).

Techniques will be compared as to efficacy and safety, as well as their utility in the typical dental practice. **In Washington State, this course will fulfill the 7 hours of CE required every 5 years for using nitrous oxide/oral conscious sedation, or can be applied towards the hours required to obtain a permit in Level Two moderate conscious sedation.**

Drugs, Death and Dentistry - PM Session:
The incidence of serious morbidity or of death within the confines of the dental office is, happily, quite low. However, on occasion, such problems do occur. Oftentimes these problems are associated with the administration of drugs associated with dental treatment.

In this presentation Dr. Malamed will review actual cases, illustrating what went wrong, and what could have been done either to prevent the incident from occurring in the first place or, failing that, what should have been done to produce a better outcome.

**About our Presenter:** Dr. Malamed, a dentist anesthesiologist, graduated from the New York University College of Dentistry in 1969 and then completed a residency in anesthesiology at Montefiore Hospital and Medical Center in New York before serving for 2 years in the U.S. Army Dental Corps. In 1973, he joined the faculty of the University of Southern California School of Dentistry, where he is Emeritus Professor of Dentistry. Dr. Malamed is a Diplomate of the American Dental Board of Anesthesiology, as well as a recipient of the Heidebrink Award [1996] from the American Dental Society of Anesthesiology and the Horace Wells Award from the International Federation of Dental Anesthesia Societies. Doctor Malamed has authored more than 160 scientific papers and 17 chapters in various medical and dental journals and textbooks in the areas of physical evaluation, emergency medicine, local anesthesia, sedation and general anesthesia. In addition, Dr. Malamed is the author of three widely used textbooks, published by CV Mosby: **Handbook of Medical Emergencies in the Dental Office** (7th edition 2015); **Handbook of Local Anesthesia** (6th edition 2012); and **Sedation - a guide to patient management** (6th edition 2016) and two interactive DVD’s: **Emergency Medicine** (2nd edition, 2008) and **Malamed’s Local Anesthetic Technique DVD** (2004) (edition 2 - 2012).
